Re; Fema Custom Pumper Fire Apparatus

\*\*\*\*\*  
King County Fire Protection District #44 (KCFD44) has taken delivery of a Custom Pumper built by Placer Fire and represented by United Fire Service. The Custom Pumper is built on an International 7400 chassis powered by a MaxxForce9 International diesel engine and an Allison 3000 EVS transmission. The unit features a 1000 GPM Hale fire pump, 500 gallon water tank, 30 gallon foam tank, Foam Pro 2000 system, a 6KW Onan hydraulic PTO Generator, Whelen LED Warning lights, and Sigtronic Headsets. The design of the apparatus allows KCFD44 better access to properties accessed along narrow driveways or areas inaccessible by standard size fire apparatus. This Fire Apparatus replaces a 1980 “department built” fire apparatus that could transport a crew of two. The new Pumper will accommodate a crew of 5. The Assistance to Firefighters Grant Program provided primary funding for the apparatus.
